APPROVED Approved! Our entire line of shinguards meet or exceed the CE standards for certified safety

HANDBETT **HANDBETT:** Ergonomically premoulded latex-layer inside for finger stability, anti-slip function and additional cushioning. Needle punch areas for breathability and best wearing comfort.

FINGER SURROUND **FINGER SURROUND:** Innovative combination of inseam cut and rollfinger palm is wrapped around the finger and connected to the backhand with an inseam. This creates a tight & ergonomic fit for reduced movement inside the glove and for safer handling. The extended, rolled sidewalls around the fingers complete with inseam create the largest possible gripping area for outstanding ball control. The preshaped fit grants close & direct ball contact for best handling performance.

PROTECTORS

Protectors | Shinguard Fastener

TorwartTECH Elbow Protector

Goalkeeper ELBOW-PROTECTOR with innovative snake-shape cushioning elements for the best protection, flexibility and fit

- ergonomic shape provides a better wearing comfort
- abrasion resistant surface material
- elastic compression sock for a better fit and fixation

Art. 100 6964

Colour 01 black
 Sizes S, M, L, XL

TorwartTECH Knee Protector

Goalkeeper KNEE-PROTECTOR with innovative snake-shape cushioning elements for the best protection, flexibility and fit

- ergonomic shape provides a better wearing comfort
- abrasion resistant surface material
- elastic compression sock for a better fit and fixation

Art. 100 6965

Colour 01 black
 Sizes S, M, L, XL

GOALKEEPER EQUIPMENT BAG

Goalkeeper Equipment Bag with handlegrip
 - volume for one pair of gloves, a towel and a water bottle
 - two-way zip closure
 - mesh pocket on the inside

Art. 100 4234

Colours 06 white/blue/black
 Sizes no size
 Fabric 100% PES

FOAM-TECHNOLOGY

SUPERGRIP

High-grip performance. SUPERGRIP.

New foam technology plus high-grip* elements.

Advantages: the foam has an ultra strong grip with optimum durability.

SUPERSOFT PLUS

THE SUPERSOFT+.

The Classic with the uhlsport formula. Even better.

ABSOLUTGRIP PLUS

Patented. Our ABSOLUTGRIP+ with improve shock absorption.

Our patented foam reigns supreme in dry weather but won't leave you in the lurch when conditions get damper.

SUPERSOFT

SOFT

STARTERSOFT

More choices for grass field? Our three SOFT foams,

which differ in one respect: again, it's about the balance between grip and abrasion resistance. The thicker a foam is the better its gripping power but the lower its abrasion resistance. The more compact a foam is the more durable it is. Only you can determine the balance that's right for you. Try them on. Decide. SUPERSOFT, SOFT or STARTER SOFT.

AQUASOFT

The future for wet conditions looks blue – uhlsport's patented Aquasoft foam with a special color theme.

All new uhlsport Aquasoft gloves come in a unique and eye-catching color theme: aquasoft blue!

The well proven uhlsport foam for wet weather conditions builds with the new blue colorway an outstanding range of Aquasoftgloves. A statement and clear differentiation on shelf and on field.

SHINGUARDS

CARBON FLEX

- ultra lite and flexible shinguard with the new uhlsport CARBON FLEX technology.
- special plate construction for improved flexibility
- materialmix of PP and carbon for low weight and a high level of protection
- embedded high shock absorption foam
- textile lamination inside for best wearing comfort
- seperate high elastic compression sock with additional TPU prints for advanced blood pressure and circulation
- anti-bacterial AEGIS treatment

Art. 100 6770

Colours **03** black/blue

Sizes S, M, L

SOCKSHIELD LITE 2.0

- extremely lightweight shinguard with compression sock.
- new asymmetric shape for optimised fitting
- removable, lightweight protection density foam plates
- sandwich construction with additional reinforcement shield inside
- ventilation and flex lines on the backside of the plates
- breathable and lightweight elasticated compression sock
- additional "air cell" elements providing an excellent shock absorption

Art. 100 6777

Colour **02** black/fluo red

Sizes XS, S, M, L, XL

SOCCER BALLS

fluo

TRI CONCEPT 2.0 PRO

- top match ball in new TRI CONCEPT design and patented TC panel construction
- durable and soft PU with underglass design and 4 layer PES lamination
- high-air retention (HAR) bladder for best playing characteristics and outstanding air retention
- new "FIFA QUALITY PRO" Certification

Art. 100 1596

Colours 01 white/navy/fluo yellow

Size 5

IMS INTERNATIONAL MATCHBALL STANDARD.

TRI CONCEPT 2.0 KLASSIK COMP

- excellent match and training ball in TRI CONCEPT design
- soft high density 1.4 mm PU with shiny finish
- 5 layer PV-lamination best playing characteristics
- high-air retention (HAR) bladder for best playing characteristics and outstanding air retention
- IMS (INTERNATIONAL MATCHBALL STANDARD)

Art. 100 1610

Colours 01 white/navy/royal

Sizes 4; 5

fluo

IMS INTERNATIONAL MATCHBALL STANDARD.

MEDUSA ANTEO

- Matchball for Futsal made of new PU upper material
- MEDUSA designprint
 - low rebound characteristics
 - IMS (INTERNATIONAL MATCHBALL STANDARD)

Art. 100 1523

Colours 01 fluo lime/cyan/navy/black

Size 4

fluo

REFLEX BALL

- special goalkeeper training ball
- for training your reflexes and secure handling
- durable TPU material

Art. 100 1612

Colour 01 fluo red/black/silver

Size no size

fluo

IMS INTERNATIONAL MATCHBALL STANDARD.

MEDUSA NEREO

- Futsal ball made of abrasion resistant structured PU material with 3D-"Hampton"- effect
- MEDUSA designprint
 - low rebound characteristics
 - IMS (INTERNATIONAL MATCHBALL STANDARD)

Art. 100 1524

Colours 02 white/fluo red/silver/black

Size 4

MEDUSA KETO

- Futsal ball made of new abrasion resistant environmental friendly kid grain PVC uppermaterial
- MEDUSA designprint
 - low rebound characteristic
 - butyle bladder for good air retention

Art. 100 1525

Colours 01 white/cyan/fluo yellow/black

Size 4

CUTS

THE CLASSIC CUT

is the embodiment of traditional values. The palm and back of the glove are stitched together along the sides of the fingers. The result = a proven design: classic, comfortable, not too tight and not too wide.

NEGATIVE CUT

in the so-called negative cut, the glove is stitched from the left. While the seam still runs along the sides of the fingers, in this cut it does not lie on the outside of the glove but faces inward. That gives these gloves a tighter fit around the fingers.

ROLLFINGER-CUT

The ROLLFINGER CUT has indeed become a UK originated trend that many connoisseurs have adopted. In this variation, the latex sheath gets rolled around the finger. The effect? Seamless all around grip, thanks to all around foam.

FINGER SURROUND

Innovative combination of inseam cut and rollfinger palm is wrapped around the finger and connected to the backhand with an inseam. This creates a tight & ergonomic fit for reduced movement inside the glove and for safer handling. The extended, rolled sidewalls around the fingers complete with inseam create the largest possible gripping area for outstanding ball control. The pre-shaped fit grants close & direct ball contact for best handling performance.

FRAME-TECHNOLOGY

The light, flexible support you can individually reinforce as you think best.

The Bionikframe-XCHANGE.

Its base = the BIONIKFRAME. Its special feature = separate reinforcing bars for the selective boosting of stabilization for certain fingers. The name XCHANGE refers to stabilization elements, which can be removed from the glove, and individually adjusted. How does it work? It's simple, the included reinforcing bars are put on top of the finger elements of your BIONIKFRAME. In this way you can individually reinforce the fingers you want to stabilize.

BIONIKFRAME+ with THUMBFRAME.

Your thumb occupies a really special position in your hand. It's your strongest finger. It excels in the disciplines of holding and throwing. The special thumb saddle joint is what gives its great mobility. It goes without saying that you want to protect it. Mind you, it's a tough task to stabilize it without sacrificing that mobility. Still, that's just what we've done, and now your thumb can get the reliable support it needs. BIONIKFRAME+ with THUMBFRAME.

The light and flexible support.

The Bionikframe.

Inspired by the best structural engineer of all time – mother Nature – the new Bionikframe is designed to mimic and enhance the natural arrangement and operation of the musculature of the human hand. The result; stable, flexible, lightweight.

For anyone who thinks protection is not their thing.

The classic.

The SUPPORTFRAME provides optimal stabilization even in entry-level and children's models. The fingers have a hinge-like construction which offers the best protection and supports the ergonomics of the hand.
